Project Kick-Off: Deep Breath Begins

The Erasmus+ Sport project "Deep Breath" officially started in October 2025, bringing together partners from Poland, Türkiye, and North Macedonia. The project aims to support individuals recovering from addiction through structured sport and physical activity. By combining sport, education, and social inclusion, Deep Breath creates safe and supportive environments where participants can rebuild confidence, improve well-being, and reconnect with society.

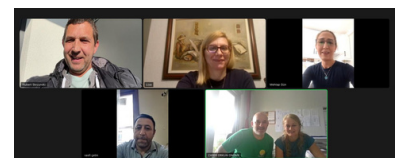

How Does It Work?

The project is implemented in two main phases. First, coaches receive specialized training to develop the skills needed to work with vulnerable groups, including communication, psychological support, and inclusive sport methods. In the second phase, trained coaches organize regular sport activities with participants in recovery, promoting physical health, social interaction, and long-term reintegration.

Partners

Association for the education of socially excluded people "Busola" (Poland) – Coordinator
Buca Ataturk Sports High School Sports Club (Türkiye)
Cycling Sport Club Association TEAM SOLARIS (North Macedonia)
Nova Association for Culture, Arts, and Youth (Türkiye)
